**Importance:** High

Here it is... It is also in the shared drive in the UIC/Class I folder. Joel

Can you send me the final spreadsheet you sent to them? I have a water board guy interested in this too and it would save me time. Also I just got off the phone with Sac water board including Ben and told him you said hello etc. told them we have an issue at sunrise also.

Hi Michele,

I'll provide you the latitude and longitude information for these "A" wells on Monday. We are on our scheduled Friday off today. I am not sure why the original well 35-18G does not have an API. The other two wells have an API numbers which I emailed you last May.

Thanks,

Sonnie

Hi Sonnie,

I have received an inquiry for the latitude and longitude for the Elk Hills wells. I have the record for one, but not the other two. Can you please provide the coordinates for:

25A-18G and 35A-18G.

I am also wondering why all three wells do not have an API number. Do you have any idea? Or perhaps my records are incorrect. Thanks, Michele
